To find the distributor nearest you, please call or email.

Notes:

INTERIOR ARTS TECHNICAL DATA

Below please find an abbreviated version of our technical data. More complete info is viewable/downloadable at ialaminates.com.

USE:

Interior Arts is recommended for interior use on vertical and light-duty horizontal surfaces. Please contact Interior Arts if you are uncertain about the use of Interior Arts in any application. Caution should be taken on surfaces that may be exposed to harsh chemicals, acidic beverages (alcoholic, colas, etc.) without cleaning the surface for lengthy periods of time.

STORAGE:

Store flat, not on edge. The laminates should be stored face-up in a cool, dry area and in a completely supported flat position. Use a top sheet of chipboard or similar material to hold stored sheets flat. Protect material from twist, rack and edge damage.

SUBSTRATES AND BALANCING SHEETS:

Interior Arts must be laminated to MDF, HDF, better quality particleboard and very good quality plywood (Baltic Birch, for example). Do not apply directly to gypsum board (sheet rock), concrete or poor quality particle board. Balancing sheets of similar thickness and material are recommended for balanced construction to prevent warping.

INTERIOR ARTS TECHNICAL DATA *CONT.*

PROTECTIVE MASK:

A protective mask is applied to Interior Arts gloss laminates only. Please remove mask after fabrication.

CLEANING AND MAINTENANCE:

Clean with a soft cloth using mild soap and water or nonabrasive glass and metal cleaning liquids. Do not use ammonia, abrasive cleaners or pads, or harsh solvents.

SHIPPING:

Interior Arts may be rolled for shipping, with limitations. All sheets are 4' x 8' size. New laminates, introduced in 2016 are .034" thick and may be rolled 5 to a carton. Existing laminates are .028" thickness and may be rolled 6 to a carton. We recommend flat packs and skidded crates for larger quantities.
